Hello, I am Rehagel, a skilled Geographic Information Systems (GIS) Specialist with expertise in GIS Mapping, Remote Sensing, Surveying, and CAD. With a strong technical foundation and hands-on experience, I excel in transforming complex spatial data into actionable insights that drive strategic decision-making and promote sustainable development.

Education Level

Vocational High Schoo - **Bencolen, Indonesia**   2019 - 2022
Geomatic Engineering

- Geographic Information Systems (GIS): Proficient in using GIS software such as ArcgisPro, Mathlab, and Database.
- Remote Sensing: Skilled in utilizing satellite and aerial imagery for information about the Earth's surface and environment.
- Surveying Techniques: Familiar with land surveying methods, including GPS (Global Positioning System) and total stations,for measuring and mapping physical features.

Work Experiences

Cargill - **Lampung, Indonesia**   Sep 2022 - Mar 2023
SupplyChain – Intern

- **Utilized geomatics surveying techniques** to assist in managing inventory and logistics distribution, ensuring efficient product delivery to the correct locations by leveraging maps and spatial data.

- **Implemented spatial data analysis** to map and optimize distribution routes for raw materials and finished products, resulting in reduced shipping costs and travel times through GIS-based route analysis.

- **Collaborated with the supply chain team** to design an inventory tracking system using GIS, which helped minimize stock loss and waste by monitoring location data and demand trends.

- **Used SAP and Microsoft Access** to input and manage customer data while monitoring distribution based on location data and demand, integrating spatial information to enhance operational efficiency.

Skills

Geographic Information Systems (GIS): ArcGIS, Matlab, AutoCAD, and Civil 3D

Remote Sensing & Surveying Techniques: GPS, Total Stations, and GNSS

SAP & Data Analysis
